

MARCUS J. MOLINARO
COUNTY EXECUTIVE

TODD N TANCREDI
DIRECTOR

COUNTY OF DUTCHESS
OFFICE FOR THE AGING

February 2022

Dear "A Matter of Balance" Participant:

Thank you for your interest in the Dutchess County Office for the Aging "**A Matter of Balance Program**".

A Matter of Balance is designed to reduce the fear of falling and increase activity levels among older adults. Participants agree to attend eight two-hour sessions designed to help them learn to view falls and fear of falling as controllable and set realistic goals for increasing activity and to promote exercise to increase strength and balance.

Please fill out the attached Participant Application and **return it to the Office for the Aging located at 114 Delafield Street, Poughkeepsie, NY 12601.**

There is a suggested contribution of **\$15** for the entire 8-week program. The *A Matter of Balance* Program is partially funded by the New York State Office for the Aging and the U.S. Administration on Aging, which require all participants to be given the opportunity to make a confidential, voluntary donation towards the cost of the service. **This is a suggested donation only, and a decision not to contribute, or the inability to contribute, will in no way impact the level of service you receive.** This suggested donation can be mailed with your application or given to the Coach on the first day of class. Checks should be made out to the Office for the Aging with **A Matter of Balance** on the memo line.

There is no need for a doctor's note for placement into *A Matter of Balance class*; however, if you have any concerns about performing very low intensity exercise, we suggest you consult your health care provider. Our only requirement is that you must be at least 60 years of age, ambulatory and able to problem solve.

You will receive a call when openings are available in the next class.

Yours truly,

Todd N. Tancredi, Director

Dutchess County Office for the Aging

PHYSICAL ACTIVITY READINESS QUESTIONNAIRE (PAR-Q AND YOU)

(This is a self-evaluation. Please return with the completed application)

Introduction: Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming more physically active. If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 and 69, the PAR-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age and you are not used to being very active, check with your doctor.

Directions: Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly: **check YES or NO**

YES	NO	
___	___	Has your doctor ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?
___	___	Do you feel pain in your chest when you do physical activity?
___	___	In the past month, have you had chest pain when you were not doing physical activity?
___	___	Do you lose your balance because of dizziness, or do you ever lose consciousness?
___	___	Do you have a bone or joint problem (for example, back, knee or hip) that could be made worse by a change in your physical activity?
___	___	Is your doctor currently prescribing drugs (for example, water pills) for your blood pressure or heart condition?
___	___	Do you know of any other reason why you should not do physical activity?

If you answered YES to one or more questions—Talk with your doctor by phone or in person BEFORE you start becoming much more physically active or BEFORE you have a fitness appraisal. Tell your doctor about the PAR-Q and which questions you answered YES.

You may be able to do any activity you want—as long as you start slowly and build up gradually. Or you may need to restrict your activities to those that are safe for you. Talk with your doctor about the kinds of activities you wish to participate in and follow his/her advice.

Find out which community programs are safe and helpful for you.

If you answered NO to all PAR-Q questions, you can be reasonably sure that you can:

Start becoming much more physically active - begin slowly and build up gradually. This is the safest and easiest way to go.

Take part in a fitness appraisal - this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively.

Delay becoming much more active:

If you are not feeling well because of a temporary illness such a cold or a fever - wait until you feel better.

Please note: If your health changes so that you then answer YES to any of the above questions, tell your fitness or health professionals. Ask whether you should change your physical activity plan.
