

OFA Case Managers (CMs) and Public Health Nurses (PHNs) assess individuals to establish and coordinate in-home services and supports that help maintain independence. Available program services may include Home Health Aides, Personal Emergency Response Systems, Social Adult Day Care, and respite care options for caregivers. These services are coordinated by the Office for the Aging (OFA) through the Expanded In-Home Services for the Elderly Program (EISEP) and the National Family Caregiver Support Program (NFCSP).

OFA also provides Alzheimer's Caregiver Consultations, designed to support families and individuals navigating the complex decisions and challenges associated with Alzheimer's disease and related symptoms. Our staff are trusted professionals who offer guidance on available programs and, when necessary, alternative levels of care.
