SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Red Hook town, Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	3,761	+/-179	3,761	(X)
Family households (families)	2,600	+/-161	69.1%	+/-4.6
With own children under 18 years	1,223	+/-150	32.5%	+/-4.4
Married-couple family	2,165	+/-160	57.6%	+/-4.5
With own children under 18 years	964	+/-149	25.6%	+/-4.3
Male householder, no wife present, family	137	+/-57	3.6%	+/-1.5
With own children under 18 years	65	+/-39	1.7%	+/-1.0
Female householder, no husband present, family	298	+/-99	7.9%	+/-2.7
With own children under 18 years	194	+/-82	5.2%	+/-2.2
Nonfamily households	1,161	+/-204	30.9%	+/-4.6
Householder living alone	988	+/-170	26.3%	+/-3.9
65 years and over	451	+/-107	12.0%	+/-2.7
Households with one or more people under 18 years	1,291	+/-133	34.3%	+/-3.9
Households with one or more people 65 years and over	1,023	+/-128	27.2%	+/-3.2
Average household size	2.56	+/-0.11	(X)	(X)
Average family size	3.09	+/-0.13	(X)	(X)
RELATIONSHIP				
Population in households	9,633	+/-211	9,633	(X)
Householder	3,761	+/-179	39.0%	+/-1.7
Spouse	2,156	+/-157	22.4%	+/-1.6
Child	2,985	+/-209	31.0%	+/-2.1
Other relatives	295	+/-97	3.1%	+/-1.0
Nonrelatives	436	+/-139	4.5%	+/-1.4
Unmarried partner	201	+/-81	2.1%	+/-0.8
MARITAL STATUS				
Males 15 years and over	4,463	+/-249	4,463	(X)
Never married	1,715	+/-264	38.4%	+/-4.5
Now married, except separated	2,260	+/-166	50.6%	+/-4.3
Separated	105	+/-56	2.4%	+/-1.3
Widowed	84	+/-52	1.9%	+/-1.2
Divorced	299	+/-117	6.7%	+/-2.6
Females 15 years and over	4,954	+/-235	4,954	(X)
Never married	1,814	+/-270	36.6%	+/-4.2

Subject	Red Hook town, Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Now married, except separated	2,298	+/-172	46.4%	+/-4.0
Separated	104	+/-67	2.1%	+/-1.3
Widowed	392	+/-90	7.9%	+/-1.8
Divorced	346	+/-134	7.0%	+/-2.8
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	99	+/-55	99	(X)
Unmarried women (widowed, divorced, and never married)	0	+/-89	0.0%	+/-27.4
Per 1,000 unmarried women	0	+/-17	(X)	(X)
Per 1,000 women 15 to 50 years old	33	+/-18	(X)	(X)
Per 1,000 women 15 to 19 years old	0	+/-40	(X)	(X)
Per 1,000 women 20 to 34 years old	73	+/-45	(X)	(X)
Per 1,000 women 35 to 50 years old	19	+/-21	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	75	+/-48	75	(X)
Responsible for grandchildren	37	+/-49	49.3%	+/-50.7
Years responsible for grandchildren				
Less than 1 year	0	+/-89	0.0%	+/-33.5
1 or 2 years	0	+/-89	0.0%	+/-33.5
3 or 4 years	32	+/-48	42.7%	+/-55.1
5 or more years	5	+/-8	6.7%	+/-12.0
Number of grandparents responsible for own grandchildren under 18 years	37	+/-49	37	(X)
Who are female	19	+/-25	51.4%	+/-4.5
Who are married	37	+/-49	100.0%	+/-48.8
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	4,130	+/-328	4,130	(X)
Nursery school, preschool	134	+/-72	3.2%	+/-1.8
Kindergarten	99	+/-58	2.4%	+/-1.4
Elementary school (grades 1-8)	1,165	+/-199	28.2%	+/-4.7
High school (grades 9-12)	575	+/-118	13.9%	+/-2.7
College or graduate school	2,157	+/-303	52.2%	+/-5.0
EDUCATIONAL ATTAINMENT				
Population 25 years and over	6,624	+/-251	6,624	(X)
Less than 9th grade	199	+/-125	3.0%	+/-1.9
9th to 12th grade, no diploma	307	+/-130	4.6%	+/-1.9
High school graduate (includes equivalency)	1,507	+/-278	22.8%	+/-4.0
Some college, no degree	1,046	+/-200	15.8%	+/-2.8
Associate's degree	545	+/-123	8.2%	+/-1.8
Bachelor's degree	1,466	+/-271	22.1%	+/-4.2
Graduate or professional degree	1,554	+/-189	23.5%	+/-3.1
Percent high school graduate or higher	(X)	(X)	92.4%	+/-2.5
Percent bachelor's degree or higher	(X)	(X)	45.6%	+/-5.2
VETERAN STATUS				
Civilian population 18 years and over	8,962	+/-207	8,962	(X)
Civilian veterans	737	+/-159	8.2%	+/-1.7
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	(X)	(X)	(X)	(X)
With a disability	(X)	(X)	(X)	(X)
Under 18 years	(X)	(X)	(X)	(X)

West Indian (excluding Hispanic origin groups)	50	+/-60	0.4%	+/-0.5

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

People in families	(X)	(X)	3.2%	+/-1.9
Unrelated individuals 15 years and over	(X)	(X)	21.3%	+/-7.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2007-2011 and 2009-2011 tables, occupation data in the multiyear files (2007-2011 and 2009-2011) were recoded to 2011 Census occupation codes. We recommend using caution when comparing data coded using 2011 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				

Subject	Red Hook town, Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Occupied units paying rent (excluding units where GRAPI cannot be computed)	780	+/-134	780	(X)
Less than 15.0 percent	94	+/-57	12.1%	+/-6.9
15.0 to 19.9 percent	65	+/-39	8.3%	+/-5.0
20.0 to 24.9 percent	40	+/-30	5.1%	+/-3.9
25.0 to 29.9 percent	119	+/-67	15.3%	+/-8.1
30.0 to 34.9 percent	150	+/-69	19.2%	+/-8.7
35.0 percent or more	312	+/-98	40.0%	+/-10.2
Not computed	79	+/-55	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, and 2011 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Two or more races	264	+/-129	2.3%	+/-1.1
Two races including Some other race	15	+/-19	0.1%	+/-0.2
Two races excluding Some other race, and Three or more races	249	+/-130	2.2%	+/-1.2
Total housing units	4,195	+/-221	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '- ' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+ ' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
