SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2010 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

Subject	Dutchess County, New York			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	106,934	+/-2,200	106,934	(X)
Family households (families)	73,992	+/-2,736	69.2%	+/-2.2
With own children under 18 years	30,593	+/-2,358	28.6%	+/-2.0
Married-couple family	57,294	+/-2,820	53.6%	+/-2.4
With own children under 18 years	23,625	+/-2,203	22.1%	+/-1.9
Male householder, no wife present, family	4,653	+/-927	4.4%	+/-0.9
With own children under 18 years	1,954	+/-722	1.8%	+/-0.7
Female householder, no husband present, family	12,045	+/-1,455	11.3%	+/-1.4
With own children under 18 years	5,014	+/-1,096	4.7%	+/-1.0
Nonfamily households	32,942	+/-2,503	30.8%	+/-2.2
Householder living alone	27,440	+/-2,478	25.7%	+/-2.2
65 years and over	9,777	+/-1,422	9.1%	+/-1.3
Households with one or more people under 18 years	34,154	+/-2,438	31.9%	+/-2.1
Households with one or more people 65 years and over	28,017	+/-1,018	26.2%	+/-1.0
Average household size	2.62	+/-0.04	(X)	(X)
Average family size	3.16	+/-0.10	(X)	(X)
RELATIONSHIP				
Population in households	279,747	+/-3,208	279,747	(X)
Householder	106,934	+/-2,200	38.2%	+/-0.6
Spouse	57,365	+/-2,764	20.5%	+/-1.0
Child	85,668	+/-3,087	30.6%	+/-1.0
Other relatives	16,631	+/-3,624	5.9%	+/-1.3
Nonrelatives	13,149	+/-2,670	4.7%	+/-1.0
Unmarried partner	6,941	+/-1,315	2.5%	+/-0.5
MARITAL STATUS				
Males 15 years and over	121,631	+/-417	121,631	(X)
Never married	44,062	+/-2,251	36.2%	+/-1.9
Now married, except separated	63,256	+/-2,638	52.0%	+/-2.1
Separated	2,190	+/-907	1.8%	+/-0.7
Widowed	2,437	+/-761	2.0%	+/-0.6
Divorced	9,686	+/-1,569	8.0%	+/-1.3
Females 15 years and over	123,024	+/-476	123,024	(X)
Never married	35,906	+/-1,903	29.2%	+/-1.5

HEALTH INSURANCE COVERAGE				
Civilian noninstitutionalized population	288,857	+/-2,063	288,857	(X)
With health insurance coverage	262,463	+/-3,320	90.9%	+/-1.0
With private health insurance	225,365	+/-5,607	78.0%	+/-1.8
With public coverage	71,993	+/-4,149	24.9%	+/-1.4
No health insurance coverage	26,394	+/-2,958	9.1%	+/-1.0
Civilian noninstitutionalized population under 18 years	65,662	+/-301	65,662	(X)
No health insurance coverage	2,337	+/-1,179	3.6%	+/-1.8
Civilian noninstitutionalized population 18 to 64 years	185,150	+/-1,722	185,150	(X)
In labor force:	147,108	+/-3,722	147,108	(X)
Employed:	133,493	+/-3,660	133,493	(X)
With health insurance coverage	118,541	+/-3,993	88.8%	+/-1.5
With private health insurance	113,698	+/-3,937	85.2%	+/-2.0
With public coverage	6,355	+/-1,595	4.8%	+/-1.1
No health insurance coverage	14,952	+/-1,947	11.2%	+/-1.5
Unemployed:	13,615	+/-1,940	13,615	(X)
With health insurance coverage	8,724	+/-1,441	64.1%	+/-6.8
With private health insurance	6,772	+/-1,222	49.7%	+/-6.9
With public coverage	2,547	+/-881	18.7%	+/-5.9
No health insurance coverage	4,891	+/-1,233	35.9%	+/-6.8
Not in labor force:	38,042	+/-3,406	38,042	(X)
With health insurance coverage	33,989	+/-3,279	89.3%	+/-2.7
With private health insurance	24,829	+/-2,330	65.3%	+/-4.4
With public coverage	11,330	+/-2,208	29.8%	+/-4.4
No health insurance coverage	4,053	+/-1,058	10.7%	+/-2.7
PERCENTAGE OF FAMILIES AND PEOPLE WHOSE INCOME IN THE PAST 12 MONTHS IS BELOW THE POVERTY LEVEL				
All families	(X)	(X)	5.1%	+/-1.3
With related children under 18 years	(X)	(X)	7.4%	+/-2.5
With related children under 5 years only	(X)	(X)	10.1%	+/-6.7
Married couple families	(X)	(X)	2.0%	+/-0.9
With related children under 18 years	(X)	(X)	1.3%	+/-1.2
With related children under 5 years only	(X)	(X)	0.0%	+/-3.7
Families with female householder, no husband present	(X)	(X)	19.3%	+/-6.3
With related children under 18 years	(X)	(X)	28.6%	+/-10.1
With related children under 5 years only	(X)	(X)	58.1%	+/-30.1
All people	(X)	(X)	7.5%	+/-1.3
Under 18 years	(X)	(X)	9.3%	+/-3.3
Related children under 18 years	(X)	(X)	9.1%	+/-3.3
Related children under 5 years	(X)	(X)	13.9%	+/-5.3
Related children 5 to 17 years	(X)	(X)	7.7%	+/-3.1
18 years and over	(X)	(X)	6.9%	+/-1.2

Subject	Dutchess County, New York			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
18 to 64 years	(X)	(X)	7.3%	+/-1.3
65 years and over	(X)	(X)	5.4%	+/-2.3
People in families	(X)	(X)	5.2%	+/-1.5
Unrelated individuals 15 years and over	(X)	(X)	18.8%	+/-4.2

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Selected earnings and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See the ACS User Notes for details.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

The Census Bureau introduced an improved sequence of labor force questions in the 2008 ACS questionnaire. Accordingly, we recommend using caution when making labor force data comparisons from 2008 or later with data from prior years. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the "Evaluation Report Covering Employment Status" at http://www.census.gov/acs/www/Downloads/methodology/content_test/P6a_Employment_Status.pdf, and the "Evaluation Report Covering Weeks Worked" at http://www.census.gov/acs/www/Downloads/methodology/content_test/P6b_Weeks_Worked_Final_Report.pdf. Additional information can also be found at <http://www.census.gov/hhes/www/laborfor/laborforce.html>.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

The health insurance coverage category names were modified in 2010. See ACS Health Insurance Definitions for a list of the insurance type definitions.

This table contains new estimates for health insurance coverage status by employment status in 2010.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010 American Community Survey

Explanation of Symbols:

1. An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

Subject	Dutchess County, New York			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
Now married, except separated	61,746	+/-2,808	50.2%	+/-2.3

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Starting in 2008, the Scotch-Irish category does not include Irish-Scotch. People who reported Irish-Scotch ancestry are classified under "Other groups," whereas in 2007 and earlier they were classified as Scotch-Irish.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2010 American Community Survey

Explanation of Symbols:

1. An "***" entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An "-" entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An "-" following a median estimate means the median falls in the lowest interval of an open-ended distribution.

4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

SELECTED HOUSING CHARACTERISTICS

2010 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	30,380	+/-2,464	30,380	(X)
Less than 15.0 percent	3,849	+/-951	12.7%	+/-3.1
15.0 to 19.9 percent	4,169	+/-965	13.7%	+/-3.0
20.0 to 24.9 percent	3,048	+/-947	10.0%	+/-3.1
25.0 to 29.9 percent	3,654	+/-1,112	12.0%	+/-3.3
30.0 to 34.9 percent	2,102	+/-623	6.9%	+/-2.0
35.0 percent or more	13,558	+/-1,845	44.6%	+/-4.8
Not computed	1,115	+/-485	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household Income are valid values.

The 2009 and 2010 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2010 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns.

Subject	Dutchess County, New York			
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error
SEX AND AGE				
Total population	297,577	*****	297,577	(X)
Male	148,353	+/-544	49.9%	+/-0.2
Female	149,224	+/-544	50.1%	+/-0.2
Under 5 years	15,239	+/-147	5.1%	+/-0.1
5 to 9 years	19,598	+/-2,015	6.6%	+/-0.7
10 to 14 years	18,085	+/-1,893	6.1%	+/-0.6
15 to 19 years	23,748	+/-1,004	8.0%	+/-0.3
20 to 24 years	22,257	+/-853	7.5%	+/-0.3
25 to 34 years	30,328	+/-1,071	10.2%	+/-0.4
35 to 44 years	40,581	+/-1,008	13.6%	+/-0.3
45 to 54 years	50,151	+/-380	16.9%	+/-0.1
55 to 59 years	21,206	+/-1,832	7.1%	+/-0.6
60 to 64 years	16,454	+/-1,594	5.5%	+/-0.5
65 to 74 years	21,041	+/-751	7.1%	+/-0.3
75 to 84 years	13,702	+/-1,085	4.6%	+/-0.4

Cuban	307	+/-268	0.1%	+/-0.1
Other Hispanic or Latino	10,974	+/-1,721	3.7%	+/-0.6
Not Hispanic or Latino	266,134	*****	89.4%	*****
White alone	221,817	+/-337	74.5%	+/-0.1
Black or African American alone	27,573	+/-1,581	9.3%	+/-0.5
American Indian and Alaska Native alone	426	+/-157	0.1%	+/-0.1
Asian alone	10,689	+/-499	3.6%	+/-0.2
Native Hawaiian and Other Pacific Islander alone	0	+/-275	0.0%	+/-0.1
Some other race alone	287	+/-290	0.1%	+/-0.1
Two or more races	5,342	+/-1,679	1.8%	+/-0.6
Two races including Some other race	413	+/-384	0.1%	+/-0.1
Two races excluding Some other race, and Three or more races	4,929	+/-1,633	1.7%	+/-0.5
Total housing units	118,676	+/-1,231	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

While the 2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
