SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
HOUSEHOLDS BY TYPE				
Total households	107,263	+/-2,057	107,263	(X)
Family households (families)	71,315	+/-2,447	66.5%	+/-1.9
With own children under 18 years	31,152	+/-1,878	29.0%	+/-1.7
Married-couple family	54,970	+/-2,641	51.2%	+/-2.2
With own children under 18 years	22,661	+/-1,835	21.1%	+/-1.7
Male householder, no wife present, family	4,549	+/-1,016	4.2%	+/-0.9
With own children under 18 years	2,157	+/-649	2.0%	+/-0.6
Female householder, no husband present, family	11,796	+/-1,402	11.0%	+/-1.3
With own children under 18 years	6,334	+/-1,038	5.9%	+/-1.0
Nonfamily households	35,948	+/-2,215	33.5%	+/-1.9
Householder living alone	29,952	+/-2,072	27.9%	+/-1.9
65 years and over	11,165	+/-1,351	10.4%	+/-1.3
Households with one or more people under 18 years	33,696	+/-1,959	31.4%	+/-1.9
Households with one or more people 65 years and over	28,573	+/-1,297	26.6%	+/-1.2
Average household size	2.60	+/-0.04	(X)	(X)
Average family size	3.20	+/-0.08	(X)	(X)
RELATIONSHIP				
Population in households	279,420	+/-2,207	279,420	(X)
Householder	107,263	+/-2,057	38.4%	+/-0.7
Spouse	55,105	+/-2,596	19.7%	+/-0.9
Child	86,900	+/-3,169	31.1%	+/-1.1
Other relatives	14,664	+/-2,471	5.2%	+/-0.9
Nonrelatives	15,488	+/-2,563	5.5%	+/-0.9
Unmarried partner	6,341	+/-1,234	2.3%	+/-0.4
MARITAL STATUS				
Males 15 years and over	121,660	+/-562	121,660	(X)
Never married	46,508	+/-1,660	38.2%	+/-1.3
Now married, except separated	60,426	+/-2,514	49.7%	+/-2.1
Separated	3,049	+/-779	2.5%	+/-0.6
Widowed	2,991	+/-731	2.5%	+/-0.6
Divorced	8,686	+/-1,461	7.1%	+/-1.2
Females 15 years and over	124,797	+/-643	124,797	(X)
Never married	40,276	+/-2,166	32.3%	+/-1.7

Subject	Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Now married, except separated	58,884	+/-2,885	47.2%	+/-2.3
Separated	2,986	+/-800	2.4%	+/-0.6
Widowed	11,575	+/-1,447	9.3%	+/-1.2
Divorced	11,076	+/-1,651	8.9%	+/-1.3
FERTILITY				
Number of women 15 to 50 years old who had a birth in the past 12 months	1,841	+/-526	1,841	(X)
Unmarried women (widowed, divorced, and never married)	561	+/-311	30.5%	+/-15.0
Per 1,000 unmarried women	14	+/-8	(X)	(X)
Per 1,000 women 15 to 50 years old	25	+/-7	(X)	(X)
Per 1,000 women 15 to 19 years old	9	+/-12	(X)	(X)

Per 1,000 women 35 to 50 years old	15	+/-9	(X)	(X)
GRANDPARENTS				
Number of grandparents living with own grandchildren under 18 years	4,945	+/-1,218	4,945	(X)
Responsible for grandchildren	1,739	+/-802	35.2%	+/-13.0
Years responsible for grandchildren				
Less than 1 year	460	+/-413	9.3%	+/-7.7
1 or 2 years	510	+/-389	10.3%	+/-7.2
3 or 4 years	383	+/-326	7.7%	+/-6.4
5 or more years	386	+/-302	7.8%	+/-6.1
Number of grandparents responsible for own grandchildren under 18 years	1,739	+/-802	1,739	(X)
Who are female	1,293	+/-625	74.4%	+/-10.3
Who are married	911	+/-508	52.4%	+/-19.6
SCHOOL ENROLLMENT				
Population 3 years and over enrolled in school	83,983	+/-2,644	83,983	(X)
Nursery school, preschool	5,278	+/-1,078	6.3%	+/-1.3
Kindergarten	3,088	+/-985	3.7%	+/-1.2
Elementary school (grades 1-8)	29,581	+/-1,542	35.2%	+/-2.1
High school (grades 9-12)	18,831	+/-1,710	22.4%	+/-2.1
College or graduate school	27,205	+/-2,751	32.4%	+/-2.5
EDUCATIONAL ATTAINMENT				
Population 25 years and over	199,108	+/-577	199,108	(X)
Less than 9th grade	7,969	+/-1,449	4.0%	+/-0.7
9th to 12th grade, no diploma	13,922	+/-1,830	7.0%	+/-0.9
High school graduate (includes equivalency)	56,796	+/-3,462	28.5%	+/-1.7
Some college, no degree	38,918	+/-3,068	19.5%	+/-1.5
Associate's degree	18,999	+/-2,300	9.5%	+/-1.2
Bachelor's degree	36,469	+/-2,202	18.3%	+/-1.1
Graduate or professional degree	26,035	+/-2,527	13.1%	+/-1.3
Percent high school graduate or higher	(X)	(X)	89.0%	+/-1.0
Percent bachelor's degree or higher	(X)	(X)	31.4%	+/-1.5
VETERAN STATUS				
Civilian population 18 years and over	233,160	+/-414	233,160	(X)
Civilian veterans	17,560	+/-1,961	7.5%	+/-0.8
DISABILITY STATUS OF THE CIVILIAN NONINSTITUTIONALIZED POPULATION				
Total Civilian Noninstitutionalized Population	290,068	+/-1,721	290,068	(X)
With a disability	37,848	+/-3,162	13.0%	+/-1.1
Under 18 years	64,094	+/-392	64,094	(X)
With a disability	2,913	+/-1,217	4.5%	+/-1.9
18 to 64 years	186,567	+/-1,687	186,567	(X)
With a disability	20,377	+/-2,413	10.9%	+/-1.3
65 years and over	39,407	+/-910	39,407	(X)
With a disability	14,558	+/-1,578	36.9%	+/-4.0
RESIDENCE 1 YEAR AGO				
Population 1 year and over	296,183	+/-553	296,183	(X)
Same house	254,524	+/-4,792	85.9%	+/-1.6

Subject	Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Different house in the U.S.	39,269	+/-4,785	13.3%	+/-1.6
Same county	24,734	+/-4,010	8.4%	+/-1.4
Different county	14,535	+/-2,860	4.9%	+/-1.0
Same state	10,319	+/-2,200	3.5%	+/-0.7
Different state	4,216	+/-2,190	1.4%	+/-0.7
Abroad	2,390	+/-1,551	0.8%	+/-0.5
PLACE OF BIRTH				
Total population	297,999	*****	297,999	(X)
Native	261,833	+/-3,157	87.9%	+/-1.1
Born in United States	258,285	+/-3,120	86.7%	+/-1.0
State of residence	207,130	+/-4,507	69.5%	+/-1.5
Different state	51,155	+/-3,453	17.2%	+/-1.2
Born in Puerto Rico, U.S. Island areas, or born abroad to American parent(s)	3,548	+/-789	1.2%	+/-0.3
Foreign born	36,166	+/-3,157	12.1%	+/-1.1

Ukrainian	1,999	+/-967	0.7%	+/-0.3
Welsh	1,560	+/-779	0.5%	+/-0.3
West Indian (excluding Hispanic origin groups)	6,097	+/-1,724	2.0%	+/-0.6

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Starting in 2008, the Scotch-Irish category does not include Irish-Scotch. People who reported Irish-Scotch ancestry are classified under "Other groups," whereas in 2007 and earlier they were classified as Scotch-Irish.

Ancestry listed in this table refers to the total number of people who responded with a particular ancestry; for example, the estimate given for Russian represents the number of people who listed Russian as either their first or second ancestry. This table lists only the largest ancestry groups; see the Detailed Tables for more categories. Race and Hispanic origin groups are not included in this table because official data for those groups come from the Race and Hispanic origin questions rather than the ancestry question (see Demographic Table).

Data for year of entry of the native population reflect the year of entry into the U.S. by people who were born in Puerto Rico, U.S. Island Areas or born outside the U.S. to a U.S. citizen parent and who subsequently moved to the U.S.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-

ended distribution. A statistical test is not appropriate.

6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

People in families	(X)	(X)	6.3%	+/-1.7
Unrelated individuals 15 years and over	(X)	(X)	25.3%	+/-3.7

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Selected earnings and income data are not available for certain geographic areas due to problems with group quarters data collection and imputation. See the ACS User Notes for details.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection. For guidance on differences in employment and unemployment estimates from different sources go to Labor Force Guidance.

The Census Bureau introduced an improved sequence of labor force questions in the 2008 ACS questionnaire. Accordingly, we recommend using caution when making labor force data comparisons from 2008 or later with data from prior years. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the "Evaluation Report Covering Employment Status" at http://www.census.gov/acs/www/Downloads/methodology/content_test/P6a_Employment_Status.pdf, and the "Evaluation Report Covering Weeks Worked" at http://www.census.gov/acs/www/Downloads/methodology/content_test/P6b_Weeks_Worked_Final_Report.pdf. Additional information can also be found at <http://www.census.gov/hhes/www/laborfor/laborforce.html>.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

The health insurance coverage category names were modified in 2010. See ACS Health Insurance Definitions for a list of the insurance type definitions.

This table contains new estimates for health insurance coverage status by employment status in 2010.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011 American Community Survey

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because

the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.

SELECTED HOUSING CHARACTERISTICS

2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Occupied units paying rent (excluding units where GRAPI cannot be computed)	31,632	+/-2,516	31,632	(X)
Less than 15.0 percent	2,680	+/-904	8.5%	+/-2.8
15.0 to 19.9 percent	2,671	+/-868	8.4%	+/-2.7
20.0 to 24.9 percent	4,358	+/-1,194	13.8%	+/-3.6
25.0 to 29.9 percent	4,004	+/-951	12.7%	+/-3.0
30.0 to 34.9 percent	2,217	+/-803	7.0%	+/-2.5
35.0 percent or more	15,702	+/-2,061	49.6%	+/-4.8
Not computed	2,529	+/-815	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2009, 2010, and 2011 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

ACS DEMOGRAPHIC AND HOUSING ESTIMATES

2011 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Dutchess County, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
SEX AND AGE				
Total population	297,999	*****	297,999	(X)
Male	147,653	+/-811	49.5%	+/-0.3
Female	150,346	+/-811	50.5%	+/-0.3
Under 5 years	15,070	+/-559	5.1%	+/-0.2
5 to 9 years	15,903	+/-1,611	5.3%	+/-0.5

Two races including Some other race	26	+/-45	0.0%	+/-0.1
Two races excluding Some other race, and Three or more races	5,080	+/-1,550	1.7%	+/-0.5
Total housing units	119,432	+/-856	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The ACS questions on Hispanic origin and race were revised in 2008 to make them consistent with the Census 2010 question wording. Any changes in estimates for 2008 and beyond may be due to demographic changes, as well as factors including questionnaire changes, differences in ACS population controls, and methodological differences in the population estimates, and therefore should be used with caution. For a summary of questionnaire changes see http://www.census.gov/acs/www/methodology/questionnaire_changes/. For more information about changes in the estimates see <http://www.census.gov/population/www/socdemo/hispanic/reports.html>.

For more information on understanding race and Hispanic origin data, please see the Census 2010 Brief entitled, Overview of Race and Hispanic Origin: 2010, issued March 2011. (pdf format)

While the 2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.
