

MEMORANDUM

To: Customers of the Schreiber Water System
From: Dutchess County Water & Wastewater Authority
Subject: Public informational forum
Date: Tuesday, February 11, 2025

Dutchess County Water and Wastewater Authority (DCWWA) would like to invite all customers of the Schreiber Water System to join us at Dover Town Hall on **Monday, February 24 at 4:30 pm** for an informational forum.

The forum will begin with a brief presentation on the history and present condition of your water system, as well as DCWWA's ongoing efforts to address the growing issue of radiological contamination in Schreiber's source water. Staff representatives will share the potential customer share of project costs, as well as the outside funding we've obtained to perform this much-needed work.

Attendees of the forum will be given a short survey administrated by the Rural Communities Assistance Partnership, DCWWA's partner in securing State and Federal grants for communities like yours. This survey could help the Schreiber Water System qualify for additional needs-based funding.

An informal question and answer session will follow. Session will last until all questions are addressed.
